Transport Conditions	Ambient
Produced in	Poland

Customer Product Specification

11. Genetically Modified Material Control Policy

Mission Foods is committed to the production of Quality products, which do not contain materials which have been derived from actual or potentially genetically modified sources. This statement is given taking into account that adventitious contamination may occur at any point up to a level of 0.9% before it is considered to be 'impure'.

It is our intention to work closely with our suppliers to ensure the genetic integrity of our materials and where applicable the identity preserved systems they employ are maintained to prevent the introduction of genetically modified stock to our facility.

We will ensure that we meet the relevant legislation set in place by Dutch and European governing bodies in the maintenance of our status. Further to this we will consult with our customers to ensure we continue to meet their requirements in terms of product, packaging and labelling.

In recognition of this commitment we will evaluate the needs of our employees in the application of this policy and provide the necessary resources and training.
