Marketing text

Originally, soybeans come from Asia. They are very popular in Europe in their processed form as tofu, tempeh and soymilk. Enjoy them also as vegetable or snack. Soybeans have a high protein content. Rapunzel has been committed for many year to the cultivation of legumes in Europe. Cultivating domestic protein crops such as lentils, beans or lupines contributes to a more versatile crop rotation and helps to conserve soil health. Legumes can be cultivated without nitrogen fertilizers. This reduces soil pollution and at the same time, legumes also enhance soil fertility, as they can absorb atmospheric nitrogen in their roots. In addition, legumes are an important nutritional basis for pollinators such as bees.
