- All deliveries must be made in packing units approved for foodstuffs, and only used for foodstuffs. Tank deliveries must be sealed.
- All deliveries must be made in such a way that the product is guaranteed against contact with smelly or other for the product damaging or hazardous material.
- Food contact materials must not transfer their components into the foods in unacceptable quantities (migration). All food contact materials used in the products must fulfill with legislation in force in the country where they are marketed.

• Nano Technologies

Hero needs to be accurately informed on the use of nano-materials in any product or raw material purchased, in order to comply with our mandatory requirement to exercise due diligence and to be able to make an informed choice.

Hero requests information on any use of engineered nano-materials, in the supplied material and that you confirm you are placing on the market products that are compliant with EU regulations and meeting all the required safety criteria.

If the product / raw material could be considered as a nanomaterial or as containing such materials, i.e. materials intentionally and newly engineered to be at the nano scale as to modify their physical and chemical properties compared to bulk materials, a comprehensive specification and a confirmation on its regulatory compliance is required.
