8.1 Chemical and physical parameters

Generally the target values of the specification are minimum values for the average values (average value \geq target value). The designated tolerance values (upper limit value and lower limit value) refer to the single pieces and are valid for the complete scope of testing (piece < upper limit value resp. piece \geq lower limit value).

Parameter	Unit of measure	Target value	Upper limit value	Lower limit value
Weight per piece	g	95	not defined	91
Length	mm	145	160	130
Width	mm	60	70	50
Height	mm	40	50	30

Parameter	Unit of measure	Weight	Estimated baking loss

*Guideline

This statement is depending on the initial value (legal tolerances) of the individual and technical feasibilities at the point in time of production.
