### Product specification

#### 7 Traceability

| The traceability of the product is ensured by means of the following designation / identification: |                          |              |              |            |         |
|--|--------------------------|--------------|--------------|------------|---------|
| X Article number X Shelf life  | e date                   | Product code | ×            | Batch numb | ber     |
| The critical raw materials used car designation / identification:                                  | n be identified by mean  | s of this    | <b>X</b> Yes | □No        |         |
| The raw materials and packaging r  | naterials used are speci | fied         | Yes          | □No        | □Partly |
| 8 Product-Parameter  |                          |              |              |            |         |

### 8.1 Chemical and physical parameters

Generally the target values of the specification are minimum values for the average values (average value  $\geq$  target value). The designated tolerance values (upper limit value and lower limit value) refer to the single pieces and are valid for the complete scope of testing (piece < upper limit value resp. piece > lower limit value).

| Parameter        | Unit of measure | Target value | Upper limit value | Lower limit value |
|------------------|-----------------|--------------|-------------------|-------------------|
| Weight per piece | g               | 125          | not defined       | 121               |
| Length           | mm              | 165          | 180               | 150               |
| Width            | mm              | 55           | 60                | 50                |
| Height           | mm              | 27           | 30                | 24                |

| Parameter  | Unit of measure | Weight   | Estimated<br>baking loss |
|--|-----------------|----------|--------------------------|
| TS product weight<br>after finishing<br>according to baking<br>instruction | g               | Ca. 111* | Ca. 11%                  |

#### \*Guideline

This statement is depending on the initial value (legal tolerances) of the individual and technical feasibilities at the point in time of production.

### 8.2 Microbiological parameters of pastries

| Parameter                            | pastries de<br>(dough: RD |              | •           |  |
|--------------------------------------|---------------------------|--------------|-------------|--|
| i di dificici                        | onit                      | target value | upper limit |  |
| Aerobic mesophilic<br>colony count   | cfu/g                     | -            | -           |  |
| Coagulase positive<br>staphylococcus | cfu/g                     | 100          | 1000        |  |
| presumed Bacillus<br>Cereus          | cfu/g                     | 100          | 1000        |  |
| E. Coli                              | cfu/g                     | 100          | 1000        |  |
| Mould                                | cfu/g                     | 10000        | -           |  |
| Salmonella                           | cfu/25g                   | -            | n.n.        |  |
| Listeria monocytogenes               | cfu / g                   | -            | 100         |  |

n. d. = "not detectable"

The microbiological values conform to the LFGB or the guidelines of the DGHM: The micro-biological parameters are examined as required in the context of an inspection scheme:

| × | Yes | No |
|---|-----|----|
| × | Ves | No |

### 9 Irradiation / Trans fatty acids

| Has the end product been treated with ionising radiation?                              | □ Yes           | X No |
|--|-----------------|------|
| Does the end product contain additives that have been treated with ionising radiation? | □ Yes           | × No |
| Does the product contain any artificial trans fatty acids?                             | Yes             | 🗵 No |
| If yes, does the product contain < 2g artificial trans fatty acids per 100g fat?       | Yes<br>Quantity | □ No |

#### 10 Confirmation

The supplier/manufacturer of the product hereby confirms that the delivered product (all raw materials and packing materials included) conforms to the EU regulation and to the requirements of German foodstuffs laws (laws, regulations, guidelines and rules) in their currant valid version.

The supplier/manufacturer confirms hereby that the delivered product does not contain or consist of genetically modified organisms (GMO) and that the product does not contain any ingredients made of GVO (according to regulation (EG) 1829/2003 and (EG) number 1830/2003). Accidental and technologically inevitable contaminations with genetically modified organisms up to a limit of 0.9% related to the respective ingredient are excluded. Appropriate confirmations provided by the suppliers are available.
